

Danny Yoo

Full Stack Software Engineer @ NYC

Stop selling. Start serving. Show empathy.

Experience

Software Engineer (Remote) @ Tilt Access

July 2020 – Present | Los Angeles, CA

- Managed backend responsibilities: hosting on Heroku, data model validations to match customize tables for SQL database, graphene schemas for efficient queries on large and complex datasets, and dev-ops using GitHub and Docker.
- Implementation of third-party web-services like Sendgrid for emails, Intercom for live chat, and College Scorecard for nationwide data registry of all accredited colleges.
- Wrote Python scripts with a strong understanding of data structures and algorithms to analyze and format data from 6700 colleges, and to automated building out JSON files to seed the database matching our custom fields.
- Worked independently and own large, complicated portions of the project with core team members who are also strong engineers with exceptional problem-solving skills.

Software Engineer (Remote) @ Bilflo

April 2020 – June 2020 | Chino Hills, CA

- Collaborated with a team of Senior Engineers to create content management software for staffing agencies.
- Responsible for front-end UI/UX using Bootstrap for responsive web experience, Knockout.js for data-binding renders, and JavaScript for jQuery functionality.
- Used the agile framework SCRUM for 2-week sprints with daily standups for consistent communication.
- Quickly learned new technologies like C# architecture, and Entity framework to deliver reliable production-level, clean, maintainable code on time.
- Wrote high quality code for performance by optimizing the search algorithm using regex for the frontend navigation.
- Cleared backlogged tickets on debugging to ensure quality assurance for user experience on product.

Projects

We Read Truth

Ruby on Rails, React, Redux, PostgreSQL, Heroku

A website where users can journal their devotionals using the "She Reads Truth" and "He Reads Truth" content.

ChairsBnB

Ruby on Rails, React, Redux, PostgreSQL, Heroku, AWS(S3)

Inspired by Airbnb for travelers can rent famous chairs around the world.

SchoolForce

MongoDB, Express.js, React, Node.js, Twilio API

A lite "CRM" web application that allows schools to send reminders to parents via SMS messaging.
