Fullstack Software Engineer @ NYC

Experience

Software Engineer (Remote) @ Scrum Inc

January 2021 – Present | Cambridge, MA

- Fullstack engineering with Node.js, Express, React, Redux, and MongoDB.
- Implemented new features for the Education platform that helped trainers and students manage and obtain credentials helping generate an annual revenue of 4 million dollars.
- Created DevOps processes with integration to AWS, Circle CI, Docker, and Heroku.

Software Engineer (Remote) @ Tilt Access

July 2020 – December 2020 | Long Beach, CA

- Manage the backend: hosting on Heroku with Docker and GitHub, customize tables for SQL database, graphene schemas for efficient queries on large and complex datasets.
- Implemented third-party API's like Sendgrid for emails, Intercom for live chat, and College Scorecard for nationwide data registry of all accredited colleges.
- Built Python scripts to analyze and format data from 6700 colleges, and automated building out JSON files to seed the database matching our custom fields.

Software Engineer (Remote) @ Bilflo

April 2020 – June 2020 | Chino Hills, CA

- Responsible for front-end UI/UX using Bootstrap for responsive web experience, Knockout.js for data-binding renders, and JavaScript for jQuery functionality.
- Quickly learned new technologies like C# architecture, and Entity framework to deliver reliable production-level, clean, maintainable code on time.
- Wrote high quality code for performance by optimizing the search algorithm using regex for the frontend navigation and cleared backlogged bugfix tickets.
